Anyone interested in earning their entry level, (Technician class) Amateur radio license or the Intermediate level (General Class) is invited to attend three classes on successive Saturdays, starting Saturday, March 30th April 6, 13, in the training room at Port Angeles Fire Department 5th and Laurel Street. The classes will run from 0900 to 1700 with an hour off for lunch. April 13th is a class and review in the morning. The examination session is at 1300L.

Candidates will learn Rules and Regulations, Basic Electronics, How to Operate, and Radio Frequency Safety.

There is no cost for the class, which is presented by volunteers from Clallam County Amateur Radio Club. Candidates must purchase an American Radio Relay League Technician or General License Manual at a cost of $29.95 each. Direct at http://www.arrl.org/arrl-store/ These manuals are also available from Dennis Tilton, who may be reached at 360-452-1217. (Save on shipping costs.)

The exam session cost is $15.00 for processing.

Those earning their license will be allowed to communicate with other hams worldwide, and to participate in the Amateur Radio Emergency Service, an important part of Homeland Security.

For more information, or to register for the class, call Chuck Jones, N7BV, at 452-4672 or Dennis Tilton at 452-1217.
CCARC QTC Newsletter

Just a little background on the QTC.

We use ccarcqtc@yahoo.com as a repository for information for the newsletter. So if you have something for the QTC, please send it to the yahoo address. Do not send it to one of the editors as they will just have to turn around and resend it to the yahoo address.

Please make sure the article or information is complete. As we rotate editing the newsletter you cannot be sure which editor will be piecing the newsletter together.

Please remove as much formatting from within whatever program you are using if you know how, before sending it to ccarcqtc. We do not edit, except to change fonts to a standard non-serf font (Arial which is easier to read than Times Roman). We will run a spell checker.

When first conceived the editors were given free license, it still is that way. It was understood they would endeavor to include everything submitted, within reason. For instance, off color jokes etc are not going to be printed. Thanks.

Get Your License Here!

March 30, April 6, & 13th Exam April 13, 1300

Chuck N7BV
ARRL VE-L

Have an idea for a club program? Pass them along to the members of the program committee: Bill Carter, Janet Parris, or Chuck Jones. Thanks.

MARCH PROGRAM

TBD

We need articles for the QTC newsletter. This is your newsletter.

Tell us how you became interested in Ham Radio. What did you do over the summer (just like school) huh!

Did you put up a new antenna, buy a new radio? Tell us about it.

Did you try a new mode again tell us about it.

The more you submit the less blank space we will have!

Thanks, the staff!

2 METER NETS

CCARC: Every Thursday 7:00 pm on the W7FEL Repeater.

ARES/RACES: Every Tuesday except 1st Tuesday of the month at 7:00 pm on W7FEL Repeater.

W7FEL Repeater: 146.76 MHz., offset down 600 KHz. with a tone of 100 Hz.
Random Derailed Thoughts

Sorry for being late with the QTC Newsletter. Little bit of getting older and coming home from Puyallup flea market dead tired and finding Grandkids had invaded. For me it is a three day trip, leaving here on Thursday to have lunch with an OT’er in Bellevue, then spending the night with a friend in Kent and finally on down to Puyallup on Friday for setup, up at 0400 Saturday to be on hand for the 0530 opening for the vendors.

So were you one 1800+ persons who visited the flea market this year and found something they couldn’t do without? Here is what one Western Washington DX Club member had to say: “The M&K ham fest was very popular! I reckon all of us got some really good buys (treasures?) … It cost me $20 in gas for the trip, and I bought $5 worth of goodies. But, having an 'eyeball QSO' with a lot of 'voices' and 'keyboard' pals was more than worth it!! What a bargain! …and a public thanks for all the commercial vendors that had enough faith in us to make the journey!”

I didn’t see to many CCARC members despite my job as roving security.

March has one of the neater World Wide contests the WPX SSB the last weekend of March. See http://www.cqwpx.com/rules.htm So get up that 10m antenna if you are a Technician or newly minted General - tune up and work some DX.

73, Chuck N7BV
FOR SALE or TRADE

FOR SALE: Sears SSB CB Rig, converted to 10 m ham operation. Note that this Xtal-controlled ten watt SSB rig can use an ordinary CB antenna (with a simple antenna tuner or you could trim your old antenna). Price $50, guaranteed refundable within 30 days if rig is not fully functioning. Call Jess, AF5X 681-6573 for info on frequencies, etc.

W7RJW “Net” Working

Some local nets to listen in/on/participate in. This is one good way to learn how we communicate on the airwaves as amateur (ham) radio operators. I spent a year just listening to a couple of these nets and how experienced operators talk to each other, before I even tried for my Technician license. It REALLY helped me a lot. I strongly recommend doing this on a regular basis. Enjoy!

Sunday:
LDS (Latter Day Saints) Emergency Net (you don’t have to be a member to participate) 6pm on 146.760

Monday:
Elwha Emergency Net 5:30 pm on 146.760
WARA (West Coast Amateur Radio Association) Club Net (Victoria, BC Canada) at 7pm on 146.840

Tuesday:
ARES (Amateur Radio Emergency Services) Net 7pm on 146.760 (except for the first Tuesday of the month, when ARES meets at the Clallam County Courthouse)

Wednesday:
WARA (West Coast Amateur Radio Association) Emergency Net 7pm on 146.840 Simplex Net immediately following: on 146.580

Thursday:
CCARC (Clallam County Amateur Radio Club) Net 7pm 146.760

Why Ham Radio Endures in a World of Tweets

By David Rowan
On WIRED.CO.UK

02.07.11

Somehow it makes little sense that amateur “ham” radio continues to thrive in the age of Twitter, Facebook and iPhones. Yet the century-old communications technology — which demands such commitment that you must generally pass an exam to receive a license — currently attracts around 350,000 practitioners in Europe, and a further 700,000 in the United States, some 60 per cent more than 30 years ago.

What is it about a simple microphone, a transmitter-receiver and the seductive freedom of the open radio spectrum that’s turned a low-tech anachronism into an enduring and deeply engaging global hobby?

For a start, there is that thrill in establishing a magical person-to-person long-distance radio conversation that no commodified internet communication can compete with. In a world of taken-for-granted torrents of e-mails, instant messages and Skype video-chats, there is a purity and a richness in the shared experience of exchanging “73s” during a live “QSO” with strangers on another continent.

Why, the very ham slang that defines the community — 73 translating as “best regards”, and QSOs as two-way conversations — tells practitioners that they belong to a special, mutually curious and highly courteous club. And the fact that DXers (long-distance amateur operators) take the trouble to acknowledge received transmissions and conversations by sending their new contacts custom-designed postcards through the analog postal service … well, that is charm itself in a world where it’s considered excessive to end a communication with anything more effusive than a “bestest”.

You only need study a handful of these cards to understand, even today, the old-fashioned excitement of connecting with a stranger who might be many thousands of miles away. The postcards — known as QSL cards — can be as quirky and personality-filled as the senders themselves. At times humorous and characterful, at others terse and geographically factual, they have naturally inspired their own subculture that has spurred DXers to collect and display them much as they would colorful foreign postage stamps.

The cards invariably display as a minimum some basic factual information about the sender. This will generally include the radio operator’s individual call sign, his (there are not too many “hers”) location, and a few details about the signal detected. And just to show that the Twitter generation did not invent the linguistic contractions exemplified in text-message speak, QSL cards too rely on slang and abbreviations to pack information into a tight space.

So cards will display the “RST” — the received radio station’s readability, signal and strength; perhaps details of the sender’s “XMTR” (transmitter) and “ANT” (antenna); and occasionally a request to reciprocate, expressed as the shorthand “PSE QSL TNX” (please send an acknowledgement card, thanks) or the more chatty “hw abt a crd om?” (How about a card, old man?) Old man, by the way, is not a reference to the recipient’s age — just as, on the rare occasions when the DXer is female, she is referred to as a “YL”, a young lady, whatever her chronological age.

DXers have been exchanging QSL cards since at least 1916, when Edward Andrews of Philadelphia — call sign 3TQ — recorded the receipt of a card from 8VX of Buffalo, NY. Over the next decade, the hobby took off — so much so that, by 1928, Paul Segal (W9EEA) had formulated an “amateur’s code” setting out six key qualities to which practitioners must adhere: “The radio amateur is considerate… loyal … progressive … friendly … balanced … [and] patriotic,” Segal specified, always ready for service to country and community.

Since then, the hobby has captivated royalty and celebrities alike. Among the most celebrated DXers have been the late King Hussein of Jordan (call sign JY1), Queen Noor (JY1H) and Juan Carlos,
King of Spain (EA0JC). Had you picked the right moment, you could have chatted to Morocco’s King Hassan II (CN8MH), the former Sultan of Oman (A41AA) or Bhumiphol Adulyadej, King of Thailand (HS1A).

If monarchs have never appealed, you could instead have shot the breeze with Marlon Brando (FO5GJ), prime minister Rajiv Ghandi of India (VU2RG) or the CBS anchor-man Walter Cronkite (KB2GSD) — not forgetting the singer Cliff Richard (W2JOF), Joe Walsh of The Eagles (WB6ACU) and genuinely beyond-this-world DXers such as Yuri Gagarin and Helen Sharman.

It’s little wonder that collectors describe the buzz of receiving a new exotic foreign card as akin to that of philatelists discovering a rare commemorative stamp. That explains why the late Jerry Powell, a New Jersey ham between 1928 to 2000 (W2OJW), proudly displayed the 369 cards he had gathered from Okinawa to Papua.

Another obsessive collector, Thomas Roscoe of Brookfield, Ohio (K8CX), has created an awe-inspiring QSL museum where he displays his trophies from Afghanistan to Zimbabwe. (You can see his individual cards at hamgallery.com). Take a journey with Roscoe to Wallis & Futuna Island and Western Kiribati, to Kyrgyzstan and Kerguelen Island; visit “states” whose international status is somewhat contentious, such as the Republic of Ichkeria and the Principality of Sealand; celebrate one-off events such as Operation Desert Storm in Saudi Arabia, or the Queen Mary’s last voyage.

But it’s not simply the romance of card-collecting that continues to inspire DXers, nor the blunt urge to communicate. Instead, hams talk proudly about belonging to a global “brotherhood,” with few rules and little bureaucracy and the ability to transcend language, religion and race — while never quite knowing who they might come in contact with.

Plus, of course, the chance to be a genuine real-life hero. Days after a magnitude 7.3 earthquake devastated Haiti in January, amateur radio operators were busy at work connecting rescuers within the country and contacting survivors’ families. When a magnitude 8.8 earthquake hit Chile the next month, and the phone network collapsed, a radio operator named Alejandro Jara broadcast the first information from the ground. Hams stepped in on September 11, 2001, and during Hurricane Katrina. Then there was Tony Pole-Evans, a bird lover with a short-wave radio on Saunders Island, who famously risked his life during Argentina’s 1982 invasion of the Falkland Islands to radio the first news back to Britain that 1,000 soldiers had landed on Goose Green.

How exciting it must have been to intercept that particular radio call. And boy, what a QSL card to top one’s collection. You can tweet all you like, but this is the way to communicate.

QST   QST   QST   RELAY FOR LIFE

W7RJW Becky Winters

We are calling on all members of the Clallam County Amateur Radio Club, Amateur Radio Emergency Services, and the ham community. CCARC is attempting to put together a team for the Relay For Life event in Port Angeles on June 7th and 8th 2013. This will be held at the Clallam County Fairgrounds.

The main objective is to have enough team members to cover the round-the-clock, 18 hour walk to raise money for cancer research. This would involve members to selecting a “shift” that they would commit to walk-whatever you feel you could handle. We would set up a “base of operations” such as a tent, have information on hand to pass out pertaining to our club, as well as ARES, and most importantly-raise money for the fight to cure cancer.

All of us have been touched-one way or another-by cancer and its devastating effects. Whether you are a cancer survivor, currently battling it, or have lost someone you love to it-it has touched most of our lives. We have members in our own club who have dealt with-or are dealing with it. I propose-in honor and/or memory to our own, everyone of us should volunteer this year and participate in this wonderfully worthwhile event.

So we need YOU. Once we determine we have enough participants step up to “walk the walk”, we will proceed further and register our “Clallam County Amateur Radio Relay for Life Team-2013”. To volunteer, you can email me at w7rjw@yahoo.com or come to our club meeting March 13 7 PM at the Port Angeles Fire Department at 5th and Laurel St in Port Angeles. You can also contact any of the club officers.

Please indicate what times you would be available to walk. Things start off at 6pm on the 7 and end at 12 noon on the 8th. We need to get registered ASAP.

Hope to hear from you soon.
STRAYS

Wanted to purchase: Icom CR-502 TCXO I need one for my IC-706 and they are no longer manufactured.

Dennis Tilton AD7TV 360-452-1217

Becky says: Hey all,
I came across this today and downloaded it to my Droid. It might be a useful tool for those of us involved in emergency response/management.
